

## KAPA'AU VETERINARY CENTER

### **Job listing in a warm tropical location!**

Thinking about getting out of the cold and wet? We are in a rural area of Hawaii, close to the beaches. The weather is a pretty constant mid-70's all winter long, with tropical trade winds. We also have an active volcano and many different microclimates. If you like the warm ocean, hiking, and a friendly community, this is the place.

We are a 2-doctor small animal practice on the Big Island of Hawaii. We provide small animal medical and surgical services to the local community and acupuncture services island wide. We use Avimark software, have a full in-house laboratory (Abaxis), digital radiography, perform lots of dentistry and soft tissue surgery.

We are looking for a technician with some experience able to:

- perform venipuncture,
- calculate drug doses,
- monitor surgical anesthesia,
- perform in house laboratory procedures,
- preferably has some dentistry skills,
- monitor hospitalized patients and
- communicate well with clients.

We are looking for a **full-time technician** interested in a minimum 2-year commitment.

Contact us by sending your resume to [resumes@kapaauvet.com](mailto:resumes@kapaauvet.com).

We'll send photos of the clinic and staff, and set up a Skype or phone interview as the first step.
